

Flow Control : Conditional Programming

```
bool red = false;
bool green {true};
bool yellow {false};
bool police_stop{true};

/*
 *      If green : go
 *      If red, yellow : stop
 *      If green and police_stop : stop
 * */

if(red){
    std::cout << "Stop" << std::endl;
}
if(yellow){
    std::cout << "Slow down" << std::endl;
}
if(green){
    std::cout << "Go" << std::endl;
}
```

if

else

switch
